

terest in not permitting Sarajevo to be shelled and hundreds of thousands of people's lives to be destroyed and in working for a peaceful agreement.

I have not committed ground troops to this conflict. I have said that we will participate in NATO air strikes, and I think it is the right thing to do. But I hope the air strikes will not be necessary, and they will not occur if the Serbs will comply.

Thank you.

NOTE: The President spoke at 11 a.m. in the Old Family Dining Room at the White House. A tape was not available for verification of the content of these remarks.

Announcement on the White House Conference on Aging *February 17, 1994*

The President announced today that he is formally calling for a White House Conference on Aging to be convened in May of 1995.

"I am pleased to resume the proud traditions of White House Conference on Aging begun by President John F. Kennedy in 1961," said the President, noting that there has not been a White House Conference on Aging since 1981. "The fact that this will be the last White House Conference on Aging of the 20th century makes this one even more significant."

Under the terms of the Older Americans Act, which authorizes that such a Conference be held, a 25-member policy committee chosen jointly by the President and the Congress will be selected to work out the specifics of the Conference, including its agenda and the number of participants. Earlier in the fall, President Clinton announced his selection of Robert B. Blancato, formerly of the National Italian-American Foundation and the former House Select Committee on Aging, to be the Executive Director of the White House Conference on Aging.

"An older America must soon face a new century," concluded the President. "A 1995 White House Conference on Aging allows us to plan for this challenge by working together to develop policy recommendations for the

21st century. We owe this to future generations."

Memorandum on Research Involving Human Subjects *February 17, 1994*

Memorandum for the Vice President and the Heads of Executive Departments and Agencies

Subject: Review of Federal Policy for the Protection of Human Subjects

Federally funded biomedical and behavioral research has resulted in major advances in health care and improved the quality of life for all Americans. The pursuit of new knowledge in these fields of research often requires experiments that involve human subjects. Although human subjects research is an essential element of biomedical and behavioral research, bioethical considerations must influence the design and conduct of such research.

Since 1947, when guidelines for research with human subjects were promulgated, there has been increasingly widespread recognition of the need for voluntary and informed consent and a scientifically valid design of experiments involving human subjects.

Over time, this recognition has evolved into a rigorous and formalized system of regulations and guidelines, which were codified in governmental policies on human subject research, and were included in the former Department of Health, Education and Welfare's regulations in 1974, 45 C.F.R. 46. In 1991, 16 agencies formally adopted the core of these regulations in a common Federal Policy for the Protection of Human Subjects. This Policy requires that all research protocols involving human subjects be reviewed by an Institutional Review Board. This review ensures that (1) risks are minimized and reasonable in relation to anticipated benefits; (2) there is informed consent; and (3) the rights and welfare of the subjects are maintained (56 Fed. Reg. 28003 (June 18, 1991)).

Although these regulations provide the framework for protecting human subjects in research, we must exercise constant care and ensure that these regulations are strictly en-

forced by departments and agencies. Therefore, I direct each department and agency of Government to review present practices to assure compliance with the Federal Policy for the Protection of Human Subjects and to cease immediately sponsoring or conducting any experiments involving humans that do not fully comply with the Federal Policy.

William J. Clinton

**Letter to Congressional Leaders on
the Conflict in the Former
Yugoslavia**

February 17, 1994

Dear Mr. Speaker: (Dear Mr. President:)

On October 13, 1993, I provided a further report to the Congress on the deployment of U.S. combat-equipped aircraft to support efforts of the United Nations and the North Atlantic Treaty Organization (NATO) to achieve peace and stability in Bosnia-Herzegovina. As part of my continuing efforts to ensure that Congress is fully informed, I am again writing to you, consistent with the War Powers Resolution, to inform you that the United States has expanded its participation in this important effort to reach a peaceful resolution of the conflict in the former Yugoslavia.

Beginning with United Nations Security Council Resolution 713 of September 25, 1991, the United Nations has actively sought solutions to the crisis in the former Yugoslavia. In Resolutions 781 and 786 (October 9 and November 10, 1992), the Security Council established a ban on all unauthorized military flights over Bosnia-Herzegovina. Responding to "blatant violations" of the no-fly ban, in Resolution 816 (March 31, 1993) the Security Council extended the ban and authorized Member States and regional organizations to take "all necessary measures" to ensure compliance with the no-fly zone. NATO agreed to enforce the no-fly zone and "Operation Deny Flight" commenced on April 12, 1993.

Under Security Council Resolution 824 (May 6, 1993), certain parts of Bosnia-Herzegovina have been established as "safe areas." Sarajevo is specifically included as a safe area that "should be free from armed

attacks and from any other hostile act." In addition, authority for the use of force in and around Sarajevo to implement the U.N. mandate is found in Security Council Resolutions 836 and 844 (June 4 and 18, 1993), which authorize Member States, acting "nationally or through regional organizations," to use air power in the safe areas to support the United Nations Protection Forces (UNPROFOR), subject to close coordination with the Secretary General and UNPROFOR.

As my previous reports to you have described, the participating nations have conducted phased air operations to prevent flights over Bosnia-Herzegovina that are not authorized by UNPROFOR. The United States has played an important role by contributing combat-equipped fighter aircraft, along with electronic combat and supporting tanker aircraft, to the operations in the airspace over Bosnia-Herzegovina. The no-fly zone has eliminated air-to-ground bombings and other air combat activity in Bosnia-Herzegovina. Most violations have involved rotary-wing aircraft. Our enforcement operations have been conducted safely with no casualties to date.

Recent heavy weapons fire in the Sarajevo area has resulted in a continuing heavy loss of life as well as serious injuries among the civilian population. An attack on February 4, 1994, killed ten people, and the following day a Sarajevo civilian marketplace was hit by a mortar attack that caused numerous civilian casualties, including 68 deaths. The United Nations Secretary General thereafter requested NATO to authorize, at the request of the United Nations, air operations against artillery or mortar positions determined by UNPROFOR to have been involved in attacks on civilian targets in the vicinity of Sarajevo.

On February 9, 1994, NATO accepted the U.N. Secretary General's request and authorized air operations, as necessary, using agreed coordination procedures with UNPROFOR. In addition, NATO took the decision to set a deadline for the withdrawal of heavy weapons (including tanks, artillery pieces, mortars, multiple rocket launchers, missiles and anti-aircraft weapons) from within 20 kilometers of the center of Sarajevo, with the exception of an area of two
